

MWP2026 Exhibitor Call for Participation

The International Conference on Microwave Photonics (MWP 2026) will be held over four days, from Monday, August 24 to Thursday, August 27, 2026, at Kunibiki Messe (Shimane Prefectural Convention Center) in Matsue City, Shimane Prefecture, Japan. This conference is a long-established international forum with a history spanning more than 30 editions, dedicated to the field of microwave and millimeter-wave photonics (MWP), which lies at the intersection of wireless and optical technologies.

MWP 2026 marks the first time in 12 years that the conference will be held in Japan, bringing together leading researchers and developers from around the world. In conjunction with the conference, an exhibition is being planned to provide companies and institutions related to a wide range of fields—from high-frequency technologies to photonics—with an opportunity to showcase their development technologies and latest products. Through this exhibition, we aim to promote mutual growth and collaboration between the MWP research community and related industrial sectors.

The exhibition area will also be used for coffee breaks and other networking activities, serving as a space where participants can gather between technical sessions. Comprehensive support will be provided to ensure that even first-time exhibitors can participate smoothly. We sincerely hope that you will appreciate the purpose of this exhibition and kindly consider exhibiting with us.

■ Event Overview

Schedule	August 24 (Mon) - August 27 (Thu), 2026
